

15% DISCOUNT

CUSTOM GENE SYNTHESIS

- Available from **25bp!**
- High capability and capacity to synthesize gene > 5kb
- We deliver Gene in circularized plasmid & normalized to 4µg final yield (**GUARANTEED**)

SAVE THE TIME WITH GENE SYNTHESIS APPROACH,

SAVE THE MONEY NOW WITH IDT YEAR-END PROMO!

- Available from **125bp!**
- gBlocks (starting from 1000bp-3000bp) from **RM1xxx !**
- What to do with gBlocks?
Antibody research, CRISPR-mediated genome editing, use as qPCR standards (+ve control)

gBLOCKS® GENE FRAGMENTS

BUY 1 FREE 1

FOR NEW CUSTOMER ONLY

Terms and Conditions apply.

- Promotional price applicable to all sequences based on length, separate charges on added complexity (eg. Hairpin/High GC content/equivalents)
- Gene sequence with added complexity can interfere with assembly and this may result in lesser yield.
- Promotion valid from 1st November 2019 until 15th December 2019.
- Purchase Order (PO) must be received before 15th December 2019 to enjoy this privilege.
